

## After sanction and opportunities for direct banking transactions

Here is an account of seminars held by Arya-machine (representative company of Accotex and Texparts). The seminar was held in Tehran, Kashan, Isfahan and Yazd with the aim of presenting technical data explanation and introducing the latest products of Accotex and Texparts. 69 spinning companies attended in the seminar from all over Iran.

Arya-Machine Company which represents Accotex and Texparts in Iran was established on May 2011 to provide sale counseling and after-sales services of European textile machinery and spare parts in Iran textile industry.

Regarding the latest scientific and technical knowledge and the state-of-the-art product technology, Arya Machine Co want to present the best technological and commercial services in textile industry. Having a wide scope of statistical info about textile industries all around the world and working in closed collaboration with textile research institutes, it is now looking for a greatest possible quality and quantity for textile companies in Iran.

In Tehran's seminar which was in Parsian-Evin hotel, Joachim Matthias Hertzig- Head of technology of Texparts- introduced the company and said: "Texparts with over 80 years of experience in production of ring and flyer spare parts is the most popular company in the world."

He continued; all the present products of today's texparts, were manufactured under name of SKF till 1999., Texparts company manufactured those spare parts in Germany with buying the production privilege of textile products from SKF. Later in 2000 Saurer company bought texparts and in 2007 it was assigned to Oerlikon group, in 2013 Saurer bought it again and this company and similar ones are now working as Saurer textile components, which is the largest textile machinery manufacturer nowadays. Texparts products are widely used in machinery manufacturing like Zinser, LMW, Marzoli, Savio, Cognimetex and more other brands. Hertzig also introduced the latest products of the company and discussed all technical data with Iranian participants and counterparts asked their questions about some spinning systems and their new features. At the second part Cemil Esen, -Accotex area sales manager- discussed some of Accotex products.

This company is another subset of Saurer textile company and like Texparts in 2000 was bought by Saurer group. Cots and aprons of this company doubtlessly have the best quality in comparison with other manufacturer across the world. They are used as original parts in pre-spinning and spinning machines as ring, open-end and airjet machines of different spinning machinery manufacturers.

Esen like the previous speaker focused his speech on introducing Accotex products and achievements and finished with answering questions of Iranian guests.

A similar seminars were held in Kashan, Isfahan and Yazd. According to Mr. Ramin Adikhah - managing director at Arya Machine- announcement, 69 spinning mills participated in the seminar and it's a good sign of high potential of this industry at the close future. He pointed out those economic sanctions against Iran especially after 2010 which were simultaneously happening with the increasing of exchange rates, inflammation and hardening commercial procedures especially applied from western countries caused a decrease in marketing of this company in comparison to the last years. But according to the importance of Accotex and Texpart's products and their function on the final textile products, all of the costumers could provide them despite all the sanction problems, though it should be mentioned that the only problem was banking transactions. Adikhah clarified that sanction affected all of industries in Iran but in textile there were more problems as well, like smuggling yarn and fabric, immethodical imports of yarns and fabrics without customs taxes caused a decrease in yarn price and leading up to an increase in Supply and a decrease in demand for yarn consumers. This caused a decrease in production of Iran textile industries up to 50% of their capacities and will go on, which even with removing the sanctions this problem will stay unsolved. The only problem that is improved after sanctions is banking transactions that made it easier to buy machinery, raw material and spare parts. Establishing new companies and improving the ones that already exist in order to improve the quality and quantity of products- by consideration of market demands- makes the situation better after sanctions.

Developments underway relating to the needling process include 'needle module technology' whereby needles are pre-mounted in multiple units of 22 for insertion into very high density boards. Needle insertion and precision will be increased particularly with the possible use of robot technology.

Variopunch needling technology could employ these multi-needle modules to erase bad spots in a felt by a variable needle arrangement in order to achieve a better evenness of the stitching pattern. When fully developed Variopunch is intended to allow a more homogeneous distribution of stitches for superior surface quality.

In addition to wide needling lines for the economic production of large volume products as in the geotextile industry, Dilo offers a compact line which is designed for the production of small amounts of high quality felts, used e. g. in the medical sector and for specialty felts made from specialty fibres.

This compact line includes fibre opening and blending, card feeding, carding and crosslapping, needling and winding. The working width of the compact carding machine is 1.1 m, the layering width is 2.2 m. The line which was first presented at the ITMA 2015 in Milan, Italy, is characterized by consistent focusing on a compact line layout, a fast adaption to changing production conditions and an economic mode of operation. For this purpose numerous innovations were realized in every single machine. These innovations also facilitate the modifications necessary for the needling of carbon fibre.

## ENGINEERING FOR NONWOVENS

February 2016 TP

Press release

**DiloGroup at IDEA 2016,  
Boston, USA, booth 1526  
May 3 – 5, 2016**

Dilo is the leading equipment supplier of complete lines for staple fibre nonwoven fabric production.

The most recent machine concepts from DiloGroup companies DiloTemafa, DiloSpinnbau and DiloMachines will be promoted with the emphasis on new equipment components which improve product quality and increase line capacity.

DiloTemafa has introduced versions of the Baltromix bale opener and the card willow which are particularly suited to the processing of longer fibres at highest throughput. Longer cleaning intervals and shorter cleaning times also result from the design changes. The DON dosing opener remains as an intermediate between fibre preparation and the card feeder and provides a fine opening stage.

DiloSpinnbau has a new 'Unifeed' card feeder which combines the principle of volumetric charged feeding with the characteristics of a chute feeder but without the conventional overhead trunk which allows for lower ceiling height requirement. The fibre flock matt is condensed by a vacuum delivery apron to give better uniformity of mass distribution. Additional flaps control this over the working width. This feeder can be adapted for medium/fine to coarse and medium to long staple fibres.

The newly developed card "VectorQuadroCard" incorporates a modular transfer group between breast and main section. The quick change facility of this roller group provides different carding options. The delivery system is also flexible to provide parallel laid, random or condensed web. The preopener section on this card has 4 worker/stripper pairs with five pairs on the main cylinder. Emphasis is on high throughput with good web quality.

DiloMachines has a new DLSC horizontal crosslapper version which allows electro-mechanical web infeed speeds up to 200 m/min depending on fibre specification. Such infeed speeds will prevent the lapper being the line bottleneck. This lapper works in conjunction with the proven CV1A web regulation system for improved felt evenness and the potential for fibre savings. This very high web infeed speed has been made possible by a further increase in the drive power within the three apron layering technology. A web guiding system ("extended web guide") can be added to avoid web wrinkles at lapper reversals.

## ITF - The No.1 Textile Exhibition In the MENA REGION.

Strategic contacts and business opportunities are the key factors that are inducing 129 exhibitors of the textile industries, from 21 countries, participate at ITF, the 4th International Textile Fair for Fabric, Garments, Accessories, Apparels, Machinery, Home Textiles, Design Print & Studios held on the 16 – 17 April, 2016 at Abu Dhabi National Exhibition Centre(ADNEC), UAE. The show has been organized for 3 successful versions since 2014 by Nihalani Events Management.

ITF16 is bringing together major players and experts in the fashion sector and featuring live demonstration and latest technology displays. It shall have a dedicated Trends and Conference Area, wherein the main aim behind the trends area is to display the exhibitor's product samples which will help the visitors to have a view of the products and direct them to the respective stand. With one month left for the show, ITF is going full house on conferences and seminars with Anna Livermora, the former Forbes winner from V.Mora, Future Fashion headed by Ayesha Siddiqua, Ahmed Badr from PANTONE, and various design universities showcasing their work.

ITF has proved to be the premier platform for manufacturers and suppliers worldwide to reach buyers and sellers from the UAE and the surrounding countries of the MENA region. The show will help to exchange market information, learn the latest innovations, gain views of experts and make direct business contacts within the fabric, apparel, accessories, machinery sector, and related supporting industries.

Qualified visitors, consisting mainly of factory owners and partners, technicians and engineers, managers, salespersons, trade professionals from the Middle East and Africa, among others have already pre-registered from day 1 of the show. Among the principal motives that lead these professionals to visit the event are to see the industry's new products and trends, meet the current trade partners/suppliers and maintain contact with colleagues, find new suppliers and meet international buyers.

## INDIA ITME 2016

5th India Government Fair, National Exhibition

India ITME Society was nominated and qualified for the award under "Royal Show Category". The award was constituted by Exhibition Showcase, supported by Government of India Ministry of Skill Development & Entrepreneurship, National Skill Development Corporation (NSDC), Indian Exhibitions Conferences & Events Services Association (IESA), Indian Exhibition Industry Association (IEIA), Indian Industries Association (IIA) & hosted by India Expo Mart, Noida.

India ITME Society was shortlisted out of the 7 nominations. The award function was held on 23<sup>rd</sup> January 2016 at India Expo Mart, Greater Noida.

Apart from the above award won by India ITME Society, Ms. Seema Srivastava, Executive Director also has won an individual award under the "Leading Ladies of Industry" Category.

Both the awards are matter of pride and achievement for the India ITME Staff and the members of our industry. This award function is expected to telecast on 13<sup>th</sup> & 14<sup>th</sup> February 2016 at 3.00 pm. on Bloomberg News channel.

India ITME Society is now gearing up for the 10<sup>th</sup> India ITME a mega Event to be held in Mumbai from 3<sup>rd</sup> – 8<sup>th</sup> December 2016 at Bombay Convention & Exhibition Center.

Another service offered by India ITME Society is an 24 x 7 online networking platform IN Zone

<http://inzone.india-itme.com> where companies can register for promotion & lead generation worldwide.

Completing 37 years of service, India ITME Society has also launched Global Textile Technology & Engineering Show (GTTES) to be held alternatively with India ITME series. GTTES is to be region specific and sector specific business platform focused on customized business solution. The 1<sup>st</sup> edition of GTTES was held on 20-22<sup>nd</sup> January 2015 in Mumbai with Weaving, Fiber & Yarn sector & Waste Water Technology customized of textile industry as focused sector.

The chairman and the steering committee members of India ITME Society express sincere thanks to all the members and associates for their unstinted support and pledges continued quality services to the industry.

The Group Photo of the Award Ceremony, 23<sup>rd</sup> January 2016, Greater Noida, India. The award was presented to the India ITME Society by the Chairman of the Exhibition Showcase, Mr. Anil Kumar, Chairman of the NSDC, Mr. Anil Kumar, Chairman of the IESA, Mr. Anil Kumar, Chairman of the IEIA, Mr. Anil Kumar, Chairman of the IIA, Mr. Anil Kumar, Chairman of the India Expo Mart, Noida.

countries with high trade activity such as, Algeria, Azerbaijan, Bangladesh, Belarus, , Bosnia - Herzegovina, Bulgaria, China, Czech Republic, Egypt, , Germany Georgia, Greece Hungary, Iraq, Iran, Ireland, Israel, Italy, Kazakhstan, Kyrgyzstan, Kosovo, Kuwait, Libya, Lebanon, Macedonia, Morocco, Netherlands, Jordan, Palestine, Russia, Sudan, Saudi Arabia, Spain, Syria, Sudan, Tunisia, Turkmenistan, Ukraine and United Arab Emirates, USA and Yemen. The Fair helped business connections to be made, orders to be placed, domestic market sales to be enhanced, and with improvements in external market connections, export revenues to be increased.

Under the Improving International Competitiveness project pursued by Bursa Chamber of Trade and Industry to contributed to the city economy with the support of the Ministry of Economy, a buying committee of nearly 140 professional businessmen from Azerbaijan, Algeria, Egypt, England, Ghana, Iraq, Iran, Kazakhstan, Kyrgyzstan, Lebanon, Moldova, Netherlands, Russia and Ukraine met with the participants of Junioshow Fair.

### **Activities That Make It Much More Than A Classical Fair**

#### **Trend Area**

Located at the foyer, "Trend Area" showcased trends in children's fashion, which attracts as much attention as adult fashion does nowadays. Products showcased in this forward-facing area carefully selected among the products of companies participating in "Trend Area Contest" by famous trend experts.

#### **Young Designers Award Ceremony**

9 students that made it to the finals in the "Young Designers Contest" for students majoring in Fashion and Textile Design in universities received their awards in a ceremony.

#### **Trend Discussions**

In the discussions which held on the Fair grounds for two days experts gave information about the industry to visitors and participating companies. Trend expert **Feriel Karoui** from the Fair's trend consultant firm Promostyl made a presentation titled "2017 Spring-Summer Trends."

#### **Junio Fashion Show**

young models presented new collections by leading companies participating in the Fair at **Junio Fashion Show**. The show is expected to have a colorful atmosphere with baby industry products came to life on the podium under the influence of producers on **Vişne Street** that are widely regarded as international trend-setters.

We thank all our participants, visitors and media for the interest they had in our Fair and we hope that we come together in next year.

January 20, 2016

## Junioshow Fair Ended On A Magnificent Platform After A Long Time In Waiting and Yearning by the Sector

Organized by Tüyap Bursa Fairs Organization Inc. and Bursa Chamber of Commerce and Industry JUNIOSHOW Bursa Baby – Kids Ready-to-wear and Kids' Necessities Fair and cooperation with Baby – Kids Textile Sector Industrialists and Businessmen Association (BEKSİAD) as well as the valuable contributions of Bursa Metropolitan Municipality, Uludağ Textile Exporters Association (UTİB) was organized between 13-17 January 2016 at Tüyap Bursa International Fair and Congress Center.

**İlhan ERSÖZLÜ:** "Junio Show that was visited by 23,948 visitors from 44 countries has brought to the sector's trade"

Tüyap Bursa Fairs Organization Inc. General Manager İlhan ERSÖZLÜ said, "Junioshow brought together more than 150 leading manufacturers and exporters in the baby and children's RTW industry together with buyers on a platform of 20,000 m<sup>2</sup> consisted of 4 halls. The Fair was visited by 23,948 visitors from 44 countries.

The latest in baby and children's RTW fashion trends showcased at Junioshow, where wholesalers, retail store staff, purchasing officers of chain stores, store / supermarket owners, managers of external trade companies involved in export activities and professional visitors coming from abroad hosted for 5 days.

### Preparation of Stands With The Same Architectural Project

Junioshow Fair stands out with its stand project, the first of its kind in Bursa Fairs. Spaces for decorated stands, which are prepared with the same architectural project in sizes of 30 / 60 / 90 m<sup>2</sup> in Halls 1, 2 and 3 where baby and children's clothing companies are located.

### With Its Trends Determined By Vişne Street, The Baby And Children's Clothing Industry was hosted Buying Committees From All Corners Of The World

Buying committees that engaged by promotion activities in a wide geography from Africa to Asia and from Europe to Middle East visited our Fair. With the coordination of Tüyap external offices, Bursa Chamber of Commerce and Industry and Turkish Ministry of Economy and the synergy created by the meeting of participating companies with businessmen from

**All eyes and ears will be on Istanbul**

At ITM 2016 Exhibition during which latest textile machinery and technologies will be presented, all eyes and ears of the textile world will be on Istanbul. Growing with the strong demand for participation, ITM 2016 will be a meeting point for both domestic and foreign manufacturers and exporters. Turkey, the most significant market for textile machinery manufacturers, stands out in the conjunctural structure of the world. Being organized under the motto: "Textile Exhibitions are held in the Land of Textile" since 2004, ITM Exhibitions have become an important brand for Turkey and the surrounding countries. ITM 2016 bearing a significant added value for our country will be an outstanding exhibition preferred by world's textile machinery manufacturers.

**Worldwide Promotional Activities**

ITM Exhibitions gain worldwide attraction with its visitors as well as with its exhibitors. In addition to local textile manufacturers showing keen interest, each exhibition is also visited by purchasing committees, groups of investors and professional visitors from all over the world. Particularly at 2013 Exhibitions, besides the neighboring countries, visitors from textile-inventing regions in the world such as Bangladesh, Vietnam, Indonesia, Iran, Egypt, Uzbekistan, Turkmenistan and Africa drew attention. An increased number of visitors from Europe and Asia, particularly Iran and countries, is expected for the ITM 2016 Exhibition. In this direction, worldwide promotional meetings and press conferences have been organized for ITM 2016 Exhibition. Activities are still running anywhere from Europe to Far East, from USA to Africa.

**HIGHTEX 2016 will be held simultaneously**

HIGHTEX 2016, the 10th International Technical Textile and Nonwovens Trade Fair, will be held in Hall 11 at Istanbul İTİAP Fair Convention and Congress Center on June 1-4, 2016. At HIGHTEX 2016 Exhibition, the first and only event in its field, raw materials for technical textiles, intermediary and final products and production technologies will be seen together. The fact that HIGHTEX 2016 Exhibition, the largest gather for technical textiles in the Middle East and Eastern Europe, will be concurrently held with ITM 2016 Exhibition will create a highly positive and efficient synergy.

Press release

PRESS RELEASE

Istanbul April 15, 2016

www.itm2016.com.tr

## THE MOST IMPORTANT DYNAMIC OF TEXTILE INDUSTRY WILL BE **ITM 2016** INTERNATIONAL TEXTILE MACHINERY EXHIBITION

ITM 2016 International Textile Machinery Exhibition and concurrent HIGHTEX 2016 International Technical Textile & Nonwoven Trade Fair expected to attract 1200 exhibitors and more than 60.000 visitors from 72 countries, will be held at Tuyap Fair Convention and Congress Center on June 1-4.

Latest technologies nationally developed in textile machinery industry will be debuted at ITM 2016. Exhibitors from 72 countries will meet more than 60.000 visitors during the exhibition that will be the most important dynamic of the textile industry in 2016. Being held with the partnership of TUYAP and TEKNİK FUARÇILIK and support by TEMSAD in 12 halls with the participation of 1200 manufacturing companies, ITM 2016 Exhibition and HIGHTEX International Technical Textile & Nonwoven Trade Fair will be the largest gathering for textile technologies, which Turkey and the region have hosted so far.

### **Istanbul, the heart of the world; ITM 2016, the address for textile industry**

ITM 2016 International Textile Machinery Exhibition is held in Istanbul, one of the world's most strategic locations in geographical terms, will be a meeting point for all the industry representatives. Istanbul, the West's doors to the East and the East's doors to the West has a position as the centre of textile industry. ITM 2016 where brands intending to become one of the actors in the world market will exhibit their innovative technology investments and new products will be the address for textile industry in 2016.

### **Sales for ITM 2016 completed**

Money traffic in the world causes industries regionally either to rally or to restrain. It is anticipated that the 2016-2017 period will be extremely positive for the region. The depreciation of EU, particularly in the Euro region, against dollar compared to previous years will further highlight Euro as an exporter. It will also lead Europe to cut down purchases from the Far East. Latest IMF has raised its forecast of growth of Turkey in 2016 from 3.6 to 3.8. The most clear indicator for this is the strong demand in ITM 2016. Sales for ITM 2016, the largest edition since its foundation / ever, have been concluded by April. Strategic importance of Turkey in textile and apparel has a great share in the increase in the number of exhibitors. ITM 2016, growing by 55% compared to ITM 2015, has further increased interest.
